

IFB25-001 Promotional Product

The following questions were submitted for IFB25-001. On behalf of PATreasury, the corresponding answers are in blue.

1. Is it a mandatory requirement that the tote bags be manufactured in the United States?
Given the potential significant difference in cost, understanding this requirement will help us provide an accurate quote.

Yes, for this IFB it is a requirement.

2. Can you provide Logos or branding guidelines for the tote bags, including pictures. The Solicitation is vague as to the requirements.

PA Treasury will provide design-quality logos to the selected vendor. Tote bags will include one of four logos for Treasury's "consumer programs" and a logo representing all four programs on the other side. Vendor may find logos on various websites or news releases available here <https://patreasury.gov> or here <https://patreasury.gov/newroom>.

3. Can you provide Historical pricing information for similar purchases?

All our former contracts are posted on Treasury's website, www.PATreasury.gov.

4. Clarification on the ordering process: will it be a single order or multiple orders over time?

PA Treasury expects to request multiple orders over time to establish and replenish stock.

5. Can you please advise what is the expected delivery date for bags?

The expected delivery date will be negotiated with the selected vendor, but Treasury expects to take delivery of orders within 30 days.

6. Do you have a reference link for the bags?

No, we do not have a link. A picture of a sample bag was provided in the IFB. Also, the size options are listed in the Deliverables Cost Tabulation Forms, as well as an option for the vendors to offer an alternative suggested size.
